

EU North
Riga LV DC1

Launched & Ready for Your Workloads

Data center area

3000 m², Isolated technological floor, Meet-me-room, 2 Switch rooms.

Specs

- 10MW
- Regular <20kW/rack
- For AI & HPC <250kW/rack
- 1500 kg per m² designed load
- Hypoxic fire prevention system
- SDMO Kohler diesel generators for redundancy in N+1 config
- 1000 racks, each up to 52U
- Suspended ceiling (hot air above)
- Trane water-cooled magnetic bearing chillers
- Weiss Technik cooling system, Vindur® CoolW@ll
- Elevator with up to 4 tn (even Smart can fit in)
- Liquid Cooling supported

Certification

ARUP & Uptime Institute accredited tier designers control & approve the project in accordance with Tier III requirements.

- Tier III Design certified
- Planned: Tier III Facility, LEED, ISO/IEC 27001:2022, ISO 22301:2019, ISO 50001:2018, ISO 9001:2015

Security

- Fence-protected territory
- Access control
- Video surveillance
- Separate server room reservation for higher level security

Convenience

Customers' room to work with equipment, accessability for disabled people.

Sustainability

- 100% green energy from Northern wind farms
- Planned PUE 1.3
- Backup generators using Neste MY diesel (with HVO derived from renewables)
- Vindur® CoolW@ll is one of the most energy-efficient systems, allowing space utilization & reducing environmental impact

Deployment Options

Standard Colocation:

4-20 kW per rack, shared environment

Business Deployment:

20-50 kW for growing infrastructure needs

Enterprise Allocation:

50 kW+ for long-term, mission-critical infrastructure

High-Density / AI Ready:

Up to 250 kW per rack, dedicated zones, For advanced, high-performance workloads.

Why DC1?

- Modular design with 500 kW – 1 MW rooms
- AI-ready
- Guaranteed capacity allocation
- Predictable power model
- Carrier-neutral connectivity

Typical use cases

- Enterprise IT infrastructure & DR
- SaaS platform scaling
- Managed service providers
- Regional cloud deployments
- AI / GPU infrastructure
